

CONCERT VEIL

ANTI-REFLECTION

The textile protection CONCERT VEIL – antireflection
removes dazzling light reflections from a raised grand piano lid,
troublesome light reflections caused by the stage's headlights via the
glossy lid. Here in the basic version made of the finest velvet.

In the picture above you can see what the members of an orchestra experience with this disturbing light reflections. Throughout the concert the musicians in the orchestra are forced to parry for these stressful light reflections behind and next to the conductor.

The text on the so-called 'Flap' is an option. The content of the embroidery text is determined by the client. This line of text acts as information for TV viewers at television recordings or live broadcasts.

Fold over the "Flap" and the gold ribbon will no longer be visible, only a large black resting surface.

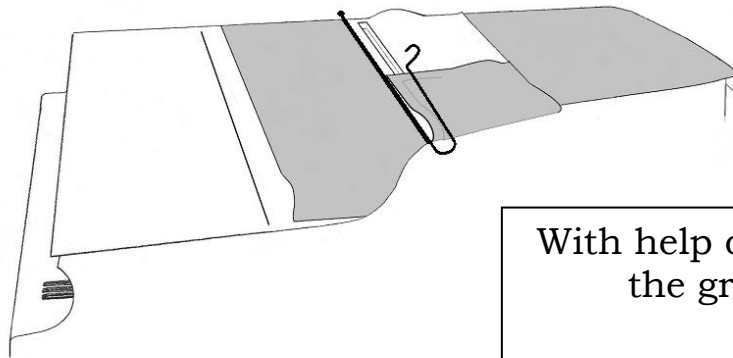

Close-up of the foldable flap and seams. CONCERT VEIL is a deluxe product with high standards. The cover is also a partial wear protection for the grand piano when it is open.

The Concert Veil hangs
gently on its custom hanger.

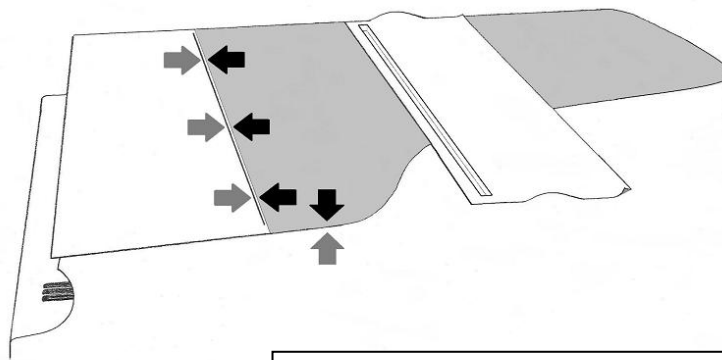

1

With help of the hanger you put the CONCERT VEIL on the grand piano faster and more smoothly.

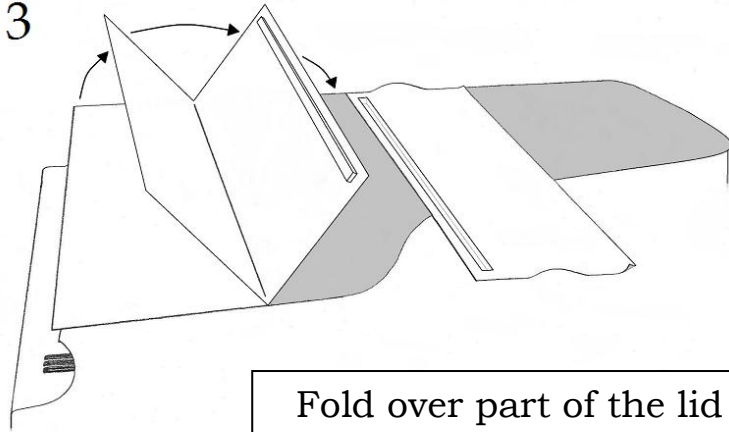

When the CONCERT VEIL is not used, it hangs easily and gently on the same hanger.

2

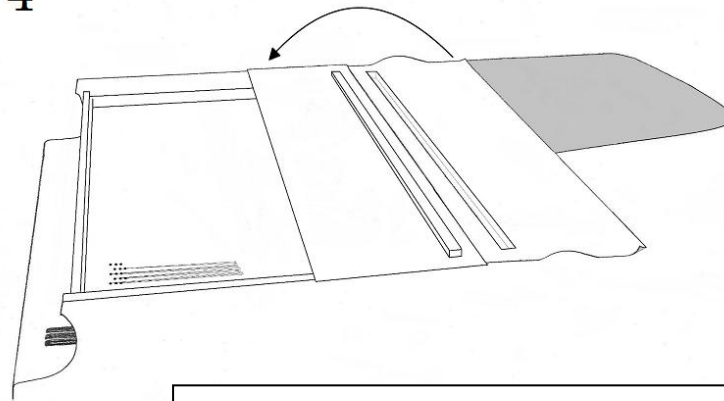

Place the cover parallel to the grand pianos hinge.

3

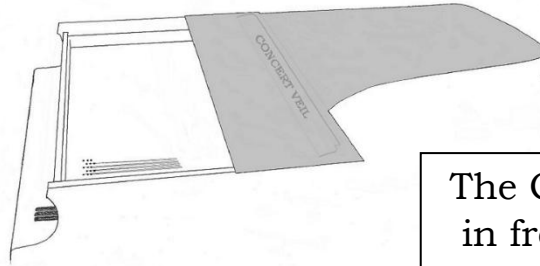

Fold over part of the lid of the grand piano. This part fixes the CONCERT VEIL to the lid.

4

Finally, fold over part of the CONCERT VEIL. All done, set up the lid, the concert can begin!

5

The CONCERT VEIL cannot be seen by the audience in front of the grand piano and behind it now no longer dazzles the orchestra.
